STANDARD ACRYLIC POLYMER TEXTURE  
(EXTERIOR & INTERIOR)

TOUGHSHEILD is decorative and protective exterior & interior undercoat coating, this synthetic grooved finish texture is based on polymer acrylic emulsion reinforced by silica quartz aggregate.

It may be applied on prepared masonry, concrete, plaster, gypsum and wood surfaces.

It is mainly applied in four variants namely VERTICAL, HORIZONTAL, CIRCULAR AND ANGULAR

Available Sizes: 30kg

# TOUGH <sup>^</sup>câre

## BOND OF QUALITY

### STANDARD ACRYLIC POLYMER PUTTY (INTERIOR)

TOUHCARE is interior decorative undercoat polymer based paste acrylic wall putty to enhance the output of the final paint finishing.

It has excellent adhesive property and can be applied on plaster of paris surfaces/gypsum walls.

It is specially formulated by using ultrafine minerals and biocides with additional superior acrylic polymer. The unique processing technology of this product ensures smoothness and consistency. The special binder used in this putty imparts a strong adhesion to the wall surface thus increasing the life of paint film.

In case of higher grade emulsions of texture coatings, we recommend use of ToughChamp standard acrylic polymer primer for desired finish

Available Sizes: 30kg
